Upcoming Price Increases

Dear Valued Customer,

On behalf of Trajan/LEAP PAL Parts, I would like to thank you for your business. We continue to work diligently to bring you the highest quality products and services at prices that are as reasonable as possible.

The global supply chain challenges continue to impact us and our manufacturing partners. Our manufacturing partners have been experiencing the challenges presented by material shortages, rising transportation costs, and increases in production cost. We have been notified by several of our manufacturers that they will be implementing mid-year price increases on average of 5% to 10% effective June 1st, 2022. As a result, the list price for these items will increase at the rate of the manufacturer's price increase effective June 1st, 2022. We will have the list of impacted items on our website www.palparts.com by May 9th.

Your discounts off the list price will remain the same and orders placed prior to June 1st, 2022 will remain at the current price. As of June 1st, please refer to our website for the list price for a specific item. Please let our customer service team or account management team know if you have any questions about the upcoming price increase for a specific item.

As always, we appreciate your business and value our partnership. We hope that the global supply chain challenges will improve in the near future.

Best Regards,

Will
